

TURF API v5

Possible API calls.

- `/feeds` Updated!
- `/regions` Updated!
- `/rounds`
- `/statistics`
- `/users` Updated!
- `/users/location`
- `/users/top`
- `/zones` Updated!
- `/zones/all`

Event API **NEW!**

Event specific calls

- `/events`
- `/events/{id}`
- `/events/{id}/feed`

All dates are in *ISO8601* time format.

- **API limitations**

v5/feeds

Request

■ GET

OPTIONAL GET PARAMETERS **NEW!**

■ `afterDate=2013-08-27T12:11:14+0000`

Note that the date needs to be url encoded, so the above date will in have to become

■ `afterDate=2013-08-27T12%3A11%3A14%2B0000`

If this is present, only posts newer than `afterDate` will be returned

GET Response

Assists for takeover type **NEW!**

```
{..., {"assists": [{"id":412, "name": "SomeAssistTurfer"}, ...]}, ...}
```

List of live-data objects ordered by time in descending order, the data can be resetted from time to time and should be handled as an alternative to an rss feed.

There is no specification of number of items returned by each request, it could be from 0 to x.

All feed items contains at least the attributes:

```
{"time":"???", "type":"???"}
```

Response:

```
[
  {"type":"takeover", "time":"2013-08-27T12:11:14+0000", {"assists": [{"id":412, "name": "turfer_assiser"}]}, {"previousOwner":{"id":654321,"name":"SomeSadPlayer"},"currentOwner":{"id":123467,"name":"SomeHappyPlayer"},"longitude":11.991361,"latitude":57.675559,"zone":{"name":"Plattan", ...}},
  {"type":"medal", "time":"2013-08-27T11:57:56+0000", "medal":6, "user":{"name":"SomeHappyPlayer", ...}},
  {"type":"chat", "time":"2013-08-27T11:14:12+0000", "message":"Chat message text ", "region":{"id":129,"name":"Dalarna"}, "country":"se", "sender":{"name":"playername", ...}},
  {"type":"zone", "time":"2013-08-27T14:00:28+0000", "zone":{"name":"Allebade t", ...}},
  ...
]
```

Current feed types:

- "takeover": Shows latest takeovers within the last 30 minutes.
- "medal": Shows latest earned medal by user
- "chat": Shows latest chat messages in game
- "zone": Shows latest created zones in the game

Its also possible to filter feed types by entering the feed types you want to show

Examples:

v5/feeds/takeover returns feed with only takeover types

v5/feeds/chat+medal returns feed with medals and chat messages only.

v5/regions

New in API v5

- Moved regionlord to POST endpoint.

Request

GET, POST

POST BODY

```
[{"id" : 141}, ...]
```

Required Headers for POST

Content-Type: application/json

GET Response

Returns all regions with current regionlords

```
[{"id":141,"name":"Stockholm","country":"se", ...]
```

POST Response

BODY

Returns the users in toplist order for the corresponding region or country with the "place" variable localized

```
[{"country":"se","name":"Stockholm","areas":[{"name":"Haninge kommun","id":1883}, ... ],"id":141,"regionLord":{"name":"~Sisyfos~","id":64357}}]
```

THROWS (Status: 400 Bad Request)

```
//If POST string is invalid  
{ "errorMessage" : "Invalid JSON string" , "errorCode" : 0xBAD0001 }
```

v5/rounds

Request

GET

GET Response

Returns monthly turf round start times.

```
[{ "start":"2013-09-01T10:00:00+0000", "name":"September" }, ... ]
```

v5/statistics

Returns current game statistics.

Request

GET

Response

BODY

```
{"zonesTakenYesterday":10505,"totalZonesTaken":3061709,"activeUsersThisRound":1451,"zonesTakenToday":7466,"usersOnline":84,"zonesTakenThisRound":78233,"totalUsers":38589}
```

v5/users Updated!

Updated in API v5

- blocktime is now in seconds instead of minutes

Request

POST

Required Headers

Content-Type: application/json

BODY

```
[{"name" : "fredrick"}, ...]
```

OR

```
[{"id" : 1803}, ...]
```

OR

```
[{"email" : "turfer...@gmail.com"}, ...]
```

OR

```
[{"name" : "fredrick"}, {"email" : "turfer...@gmail.com"}, {"id" : 1803}, ...]
```

Response

BODY

```
[{"region":{"id":141,"name":"Stockholm"},"medals":[5,9,7,36,28,4,20,24,22,25,14,17,16,17,48,17,57,62],"blocktime":30,"zones":[2428,2988,16852,7152,355,1106,16900],"uniqueZonesTaken":205,"id":1803,"pointsPerHour":31,"rank":42,"totalPoints":1976318,"name":"Fredrick","taken":7402,"points":75964,"place":15,"country":"se"}, ...]
```

THROWS (Status: 400 Bad Request)

```
//If POST string is invalid  
{ "errorMessage" : "Invalid JSON string" , "errorCode" : 0xBAD0001 }
```

v5/users/location

Request

■ GET

GET Response

Returns current players that has a location on the game map

```
[{ "id":14242, "name":"turfername" , "longitude":16.552683 , "latitude":59.604117 }, ... ]
```

v5/users/top

Request

■ GET, POST

Required Headers for POST

```
Content-Type: application/json
```

POST BODY

```
{"from": 1, "to": 10}
```

OR

```
{"country": "se", "from": 1, "to": 10}
```

OR

```
{"region": "kalmar", "from": 1, "to": 10}
```

GET Response

Returns top 50 users in order, see `/users` for all the user parameters available

```
[{"name":"leader", "place":1, ...}, {"name":"runnerup", "place":2, ...}, ...]
```

POST Response

BODY

Returns the users in toplist order for the corresponding region or country with the "place" variable localized

```
[{"name":"leader", "place":1, ...}, {"name":"runnerup", "place":2, ...}, ...]
```

THROWS (Status: 400 Bad Request)

```
//If POST string is invalid  
{ "errorMessage" : "Invalid JSON string" , "errorCode" : 0xBAD0001 }
```

v5/zones

Query the API for any zone in the game.

New in API v5

- `"region"` property now have `"area"`
- Added `"type"` for special zones

Request

POST

Required Headers

Content-Type: application/json

BODY

```
[{"name" : "plattan"}, ...]

OR

[{"id" : 138}, ...]

OR

[{"id" : 138}, {"name":"plattan"} ...]

OR

// Return all zones within an area
[ {
    "northEast" : {"latitude":59.339881, "longitude":18.086243},
    "southWest" : {"latitude":59.313259, "longitude":18.048477}
}]
```

Response

BODY

```
[{"type": {"id": 9, "name": "Holy"},"region":{"area":{"name":"Stockholms kommu  
n","id":1828},"country":"se","name":"Stockholm","id":141},"id":138,"currentOwne  
r":{"id":14022,"name":"Pelle494"},"totalTakeovers":6278,"takeoverPoints":65,"da  
teLastTaken":"2013-06-08T12:59:19+0000","name":"Plattan","pointsPerHour":9,"dat  
eCreated":"2010-09-04T16:41:37+0000","longitude":18.064098,"latitude":59.3322  
5}, ...]
```

THROWS (Status: 400 Bad Request)

```
//If POST string is invalid
{ "errorMessage" : "Invalid JSON string", "errorCode" : 0xBAD0001 }

//If the area is too big
if ( northEast["latitude"] - southWest["latitude"] ) * ( northEast["longitude"]  
- southWest["longitude"] ) > 0.05
```

```
{ "errorMessage" : "The area is too big", "errorCode" : 0xBAD0002 }
```

//If the area-coordinates arent creating a valid area

```
{ "errorMessage" : "Invalid coordinates", "errorCode" : 0xBAD0003 }
```

v5/zones/all

Returns all the zones in the game. The list updates at least once an hour.

Request

GET

Response

BODY

```
[{"dateCreated":"2016-05-17T10:00:00+0000","latitude":58.345189,"name":"LitlBri  
dge","id":65492,"totalTakeovers":0,"region":{"area":{"name":"Sokndal","id":311  
8},"country":"no","name":"Vestlandet","id":181},"type":{"name":"Bridge","id":  
8}, ...}]
```

THROWS (Status: 429 Too many requests)

//If queries twice within 30 minutes

```
{"errorMessage":"Only one request per 30 minutes allowed","errorCode":0xBAD0004}
```

Event API NEW!

v5/events

All passed events

Request

GET

Response

All public events ordered by date, only returns finished events.

BODY

```
[{"id": 246, "stop": "2015-04-18T14:00:00+0000", "start": "2015-04-18T12:00:00+0000", "name": "EventName", "longitude": 13.501434, "latitude": 59.384429, "type": "public/private"}, {"polygon": [{"longitude": 19.927409, "latitude": 60.10483}, ...], ...}]
```

v5/events/{id}

Specific finished event

Request

GET

Response

Event by ID

BODY

```
{ "id": 246, "polygon": [{"longitude": 19.927409, "latitude": 60.10483}, ...], "stop": "2015-04-18T14:00:00+0000", "start": "2015-04-18T12:00:00+0000", "name": "EventName", "longitude": 13.501434, "latitude": 59.384429, "type": "public/private", "zones": [{"polygon": [{"longitude": 13.487091, "latitude": 59.401414}, ...], "id": 48798, "takeoverPoints": 10, "name": "ZoneName", "pointsPerHour": 60, "longitude": 13.486841, "latitude": 59.401362}, ...], "participants": [{"id": 36518, "name": "participantName", "points": 1972, "place": 1}, ...]}]
```

v5/events/{id}/feed

All takeovers for a specific event

Request

GET

Response

All takovers in feed format for the current live event

BODY

```
[{"currentOwner": {"id": 0, "name": "UserName"}, "time": "2015-04-30T06:44:45+0000", "longitude": 13.907372, "latitude": 56.092683, "type": "takeover", "zone": {"id": 50890, "takeoverPo
```

```
ints: 10,name: "ZoneName",pointsPerHour: 60,longitude: 13.907372,latitude: 56.092683}},...]
```

Optional, but recommended header value for all API calls

```
Accept-Encoding: gzip
```

API limitations

Only one request per second per resource is currently allowed. This might change in the future depending on API usage.

THROWS (Status: 429 Too many requests)

```
{"errorMessage":"Only one request per second allowed","errorCode":0xBAD0004}
```

API versions

Old API versions are still available but its NOT recommended to use them, they might not be maintained in the future.

For a sneak peek of the latest API version, goto api.turfgame.com/unstable
